

# Mapping Diaspora Public Health-focused U.S. Associations

Project Title	Mapping Diaspora Public Health-focused U.S. Associations
Project Summary	Develop a report highlighting the work of groups formed by health practitioners of different diasporas. The report would include information on the range of activities of these groups, their impact and recommendations for ways in which the Dept. of State can support/highlight their work.
Country	United States
Agency	Department of State
DoS Office	S/GAC
Post	N/A
Section	N/A
Number of Interns	4

## Project Description

The Office of the U.S. Global AIDS Coordinator and Health Diplomacy (S/GAC) is seeking VSFS e-Interns to develop a report detailing the range and activities of diaspora networks involved in public health outreach to their home countries/regions. The report would include a comprehensive list with contact information for the active associations/networks that the VSFS intern is able to discover. It would also include the results of interviews with the leaders of these groups. The Global Health Diplomacy office will use this report to determine how best to support/highlight the activities of diaspora groups involved in global health work. The report will also serve as a needs assessment for the potential development of a platform that would permit these groups to network and publicize their activities. If there is enough time and depending on the skill sets of the interns, they may participate in developing a platform if the needs assessment shows that such a platform would be useful.

## Desired Skills Interests

# Additional Information

Number of interns is flexible.

# Language Requirements

*None*
